Severability

The Purchaser and the Company agree that if any portion of these Terms is found illegal or unenforceable, in whole or in part, such provision shall, as to such jurisdiction, be ineffective solely to the extent of such determination of invalidity or unenforceability without affecting the validity or enforceability thereof in any other manner or jurisdiction and without affecting the remaining provisions of the Terms, which shall continue to be in full force and effect.

ANNEX A

SWDTKN Risks

By purchasing, owning, and using SWDTKN, you expressly acknowledge and assume the following risks:

Risk of Losing Access to SWDTKN Due to Loss of Private Key(s), Custodial Error or Purchaser Error

A private key, or a combination of private keys, is necessary to control and dispose of SWDTKN stored in your digital wallet or vault. Accordingly, loss of requisite private key(s) associated with your digital wallet or vault storing SWDTKN will result in loss of such SWDTKN. Moreover, any third party that gains access to such private key(s), including by gaining access to login credentials of a hosted wallet service you use, may be able to misappropriate your SWDTKN. Any errors or malfunctions caused by or otherwise related to the digital wallet or vault you choose to receive and store SWDTKN in, including your own failure to properly maintain or use such digital wallet or vault, may also result in the loss of your SWDTKN. Additionally, your failure to follow precisely the procedures set forth in for buying and receiving Tokens, including, for instance, if you provide the wrong address for the receiving SWDTKN, or provides an address that is not ERC-20 compatible, may result in the loss of your Tokens.

Risks Associated with Solana

Because SWDTKN and the Swords of Blood platform are based on Solana protocol, any malfunction, breakdown or abandonment of the Solana protocol may have a material adverse effect on the platform or SWDTKN. Moreover, advances in cryptography, or technical advances such as the development of quantum computing, could present risks to the SWDTKN and the platform, including the utility of the SWDTKN for obtaining services, by rendering ineffective the cryptographic consensus mechanism that underpins the Solana protocol.

Risk of Mining Attacks

As with other decentralized cryptographic tokens based on the Solana protocol, SWDTKN are susceptible to attacks by miners in the course of validating SWDTKN transactions on the Solana blockchain, including, but not limited to, double-spend attacks, majority mining power attacks, and selfish-mining attacks. Any successful attacks present a risk to the platform and SWDTKN, including, but not limited to, accurate execution and recording of transactions involving SWDTKN.

Risk of Hacking and Security Weaknesses

Hackers or other malicious groups or organizations may attempt to interfere with the platform or SWDTKN in a variety of ways, including, but not limited to, malware attacks, denial of service attacks, consensus-based attacks, Sybil attacks, smurfing, and spoofing. Furthermore, because the platform is based on open-source software, there is a risk that a third party or a member of the Company team may intentionally or unintentionally introduce weaknesses into the core infrastructure of the platform, which could negatively affect the platform and SWDTKN, including the utility of SWDTKN for obtaining services.

Risks Associated with Markets for SWDTKN

If secondary trading of Tokens is facilitated by third party exchanges, such exchanges may be relatively new and subject to little or no regulatory oversight, making them more susceptible to fraud or manipulation. Furthermore, to the extent that third-parties do ascribe an external exchange value to SWDTKN (e.g., as denominated in a digital or fiat currency), such value may be extremely volatile.

Risk of Uninsured Losses

Unlike bank accounts or accounts at some other financial institutions, SWDTKN are uninsured unless you specifically obtain private insurance to insure them. Thus, in the event of loss or loss of utility value, there is no public insurer or private insurance arranged by Company, to offer recourse to you.

Risks Associated with Uncertain Regulations and Enforcement Actions

The regulatory status of SWDTKN and distributed ledger technology is unclear or unsettled in many jurisdictions. It is difficult to predict how or whether regulatory agencies may apply existing regulation with respect to such technology and its applications, including the Swords of Blood platform and SWDTKN. It is likewise difficult to predict how or whether legislatures or regulatory agencies may implement changes to law and regulation affecting distributed ledger technology and its applications, including the platform and SWDTKN. Regulatory actions could negatively impact the platform and SWDTKN in various ways, including, for purposes of illustration only, through a determination that the purchase, sale and delivery of SWDTKN constitutes unlawful activity or that SWDTKN are a regulated instrument that require registration or licensing of those instruments or some or all of the parties involved in the purchase, sale and delivery thereof. The Company may cease operations in a jurisdiction in the event that regulatory actions, or changes to law or regulation, make it illegal to operate in such jurisdiction, or commercially undesirable to obtain the necessary regulatory approval(s) to operate in such jurisdiction.

Risks Arising from Taxation

The tax characterization of SWDTKN is uncertain. You must seek your own tax advice in connection with purchasing SWDTKN, which may result in adverse tax consequences to you, including withholding taxes, income taxes and tax reporting requirements.

Risk of Competing platforms

It is possible that alternative platforms could be established that utilize the same open-source code and protocol underlying the platform and attempt to facilitate services that are materially similar to the Swords of Blood services.

Risks Arising from Lack of Governance Rights

Because SWDTKN confer no governance rights of any kind with respect to the Swords of Blood platform or the Company, all decisions involving the Company's products or services within the platform or the Company itself will be made by the Company at its sole discretion. These

decisions could adversely affect the platform and the utility of any SWDTKN you own, including their utility for obtaining services.

Unanticipated Risks

Cryptographic tokens such as SWDTKN are a new and untested technology. In addition to the risks included in this Annex A of these Terms, there are other risks associated with your purchase, possession and use of SWDTKN, including unanticipated risks. Such risks may further materialize as unanticipated variations or combinations of the risks discussed in this Annex A of these Terms.
